

THE INTERNET ORGANISED CRIME THREAT ASSESSMENT (IOCTA) 2015

Report
IOCTA

The 2015 Internet Organised Crime Threat Assessment (IOCTA) is a law enforcement-centric threat assessment intended to inform priority setting for the EMPACT Operational Action Plan for 2016 in the three sub-priority areas of cybercrime (cyber attacks, child sexual exploitation online and payment fraud). The IOCTA also seeks to inform decision-makers at strategic, policy and tactical levels on how to fight cybercrime more effectively and to better protect online society against cyber threats.

The 2015 IOCTA provides a view from the trenches, drawing primarily on the experiences of law enforcement within the EU Member States to highlight the threats visibly impacting on industry and private citizens within the EU. The IOCTA is a forward-looking assessment presenting analyses of future risks and emerging threats, providing recommendations to align and strengthen the joint efforts of EU law enforcement and its partners in preventing and fighting cybercrime.
