JOINT REPORTS

25I-NBOMe

EMCDDA–Europol Joint Report on a new psychoactive substance: 25I-NBOMe (4-iodo-2,5-dimethoxy-*N*-(2-methoxybenzyl)phenethylamine)

In accordance with Article 5 of Council Decision 2005/387/JHA on the information exchange, risk assessment and control of new psychoactive substances

About this series
EMCDDA–Europol Joint Report publications examine the detailed information provided by the EU Member States on individual new psychoactive substances. Information is collected from the Reitox network, the Europol national units and the national competent authorities of the European Medicines Agency. Each Joint Report serves as the basis upon which the decision to conduct a risk assessment of the new psychoactive substance is taken. It is part of the three-step procedure involving information exchange, risk assessment and decision-making in the framework of the Council Decision 2005/387/JHA.

ISSN 1977-7868

EUROPOL

EMCDDA–Europol joint publication

The EMCDDA–Europol Joint Report on new psychoactive substance 4-iodo-2,5-dimethoxy-*N*-(2-methoxybenzyl)phenethylamine, commonly known by the abbreviation '25I-NBOMe', submitted in December 2013 to the Council of the EU, the European Commission and the EMA. After assessing the available evidence, the EMCDDA and Europol concluded that sufficient information had been accumulated to merit the production of a Joint Report on 25I-NBOMe as stipulated by Article 5.1 of the Decision.
