Table 2 - Modifications of contracts⁶:

The contracting authority may modify a contract or framework contract without a procurement procedure only in the cases provided for below and provided the modification does not alter the subject matter of the contract or framework contract.

A contract, a framework contract or a specific contract⁷ under a framework contract may be modified without a new procurement procedure in any of the following cases:

(a) for additional works, supplies or services by the original contractor that have become necessary and that were not included in the initial procurement, where the following conditions are met:

- (i) a change of contractor cannot be made for technical reasons linked to interchangeability or interoperability requirements with existing equipment, services or installations;*
- (ii) a change of contractor would cause substantial duplication of costs for the contracting authority; and*
- (iii) any increase in price, including the net cumulative value of successive modifications, does not exceed 50 % of the initial contract value;*

(b) where all the following conditions are fulfilled:

- (i) the need for modification has been brought about by circumstances which a diligent contracting authority could not foresee; and*
- (ii) any increase in price does not exceed 50 % of the initial contract value;*

(c) where the value of the modification is below the following thresholds:

- (i) the Directive thresholds applicable at the time of the modification; and*
- (ii) 10 % of the initial contract value for public service and supply contracts and works or services concession contracts and 15 % of the initial contract value for public works contracts.*

The initial contract value shall not take into account price revisions. The net cumulative value of several successive modifications under point (c) shall not exceed any threshold referred to therein.

⁵ For framework contracts, the maximum value for the whole framework contract duration is listed.

⁶ As some of the modifications concerned a combination of both amounts below the Directive thresholds and amounts above the Directive thresholds, this list contains all contract modifications (both below and above Directive thresholds).

⁷ Modifications of specific contracts under framework contracts are reflected also in the aggregated values listed in Tables 3 and 5.
